

10X Vision Workbook

Part 1: Velocity - Reflecting on Your 10X Jump

What was your 10X jump last year?

Reflect on your biggest leap forward over the past year. This could be in your career, personal growth, leadership, or a significant achievement.

Exercise: Write down one area where you experienced exponential growth.

What actions, mindset shifts, or resources contributed to this leap?

What is your projected 10X jump in your vision?

Think boldly and don't limit your imagination. A 10X jump doesn't happen with small steps-it requires audacious goals.

Exercise: Write a clear, bold statement about your projected 10X goal.

Break it down into smaller milestones.

Part 2: Intentions - The 'Why' Behind Your Vision

What are your intentions in creating your vision?

Intentions clarify the purpose and motivation behind your vision. Why does this matter to you? What is driving your passion?

Exercise: Write a short paragraph starting with 'My intention for creating this vision is...'

Aligning Intentions with Actions:

Ensure your daily actions align with your larger intention. Are your habits supporting your vision?

Exercise: Write down three daily habits that align with your vision's intention.

Part 3: Service - Who Are You Going to Serve?

Who is your vision for?

Every powerful vision serves a greater purpose and impacts others. Identify your target audience.

Exercise: Write down three key insights about your audience and their needs.

Part 4: Integration - Bringing It All Together

Reflect on the three pillars: Velocity, Intentions, and Service.

Exercise: Write a one-page pre-vision statement incorporating these three components.

Action Plan: Create a weekly action plan focusing on key tasks for each pillar.

Conclusion

A transformative vision combines bold velocity, clear intentions, and a commitment to service.

Reflection Questions:

- What stood out most to you in today's lesson?
- What is one action step you will take this week toward your vision?
- How will you hold yourself accountable?

Next Lesson Preview: We'll dive deeper into building Ideas, Objects, and Necessity around overcoming obstacles on the path to implementing your vision.
